# The gains for Statistics Sweden

- Is information in annual reports important for business statistics?
- What is the gains of having the whole annual report in a structured format (for all enterprises)?

# Direct implications

- Prepare for the receiving of Annual report information in XBRL format from Swedish Companies Registration Office (Bolagsverket)
  - Technical solution
- Directly involved in development of:
  - a common standard for concepts
  - a common infrastructure for taxonomies
- Initialise development of a statistical taxonomy
  - Re-use of common concepts for the Structural business statistics

# Possible re-use of financial information

# Indirect implications

- Common infrastructural design of content and technical solutions
  - Software companies can use the same "technology" for several reporting solutions
- Ability to create efficient solutions for the data to Statistics Sweden
  - Re-use of common concepts in combination with concepts "unique" for statistics
  - But there is a need for coordination between statistical surveys

# Coordination for efficient solutions for enterprises

## Coordinated collection

- Coordinated terms and definitions
- Fewer questionnaires
- Year, quarter, month

## Common decisions

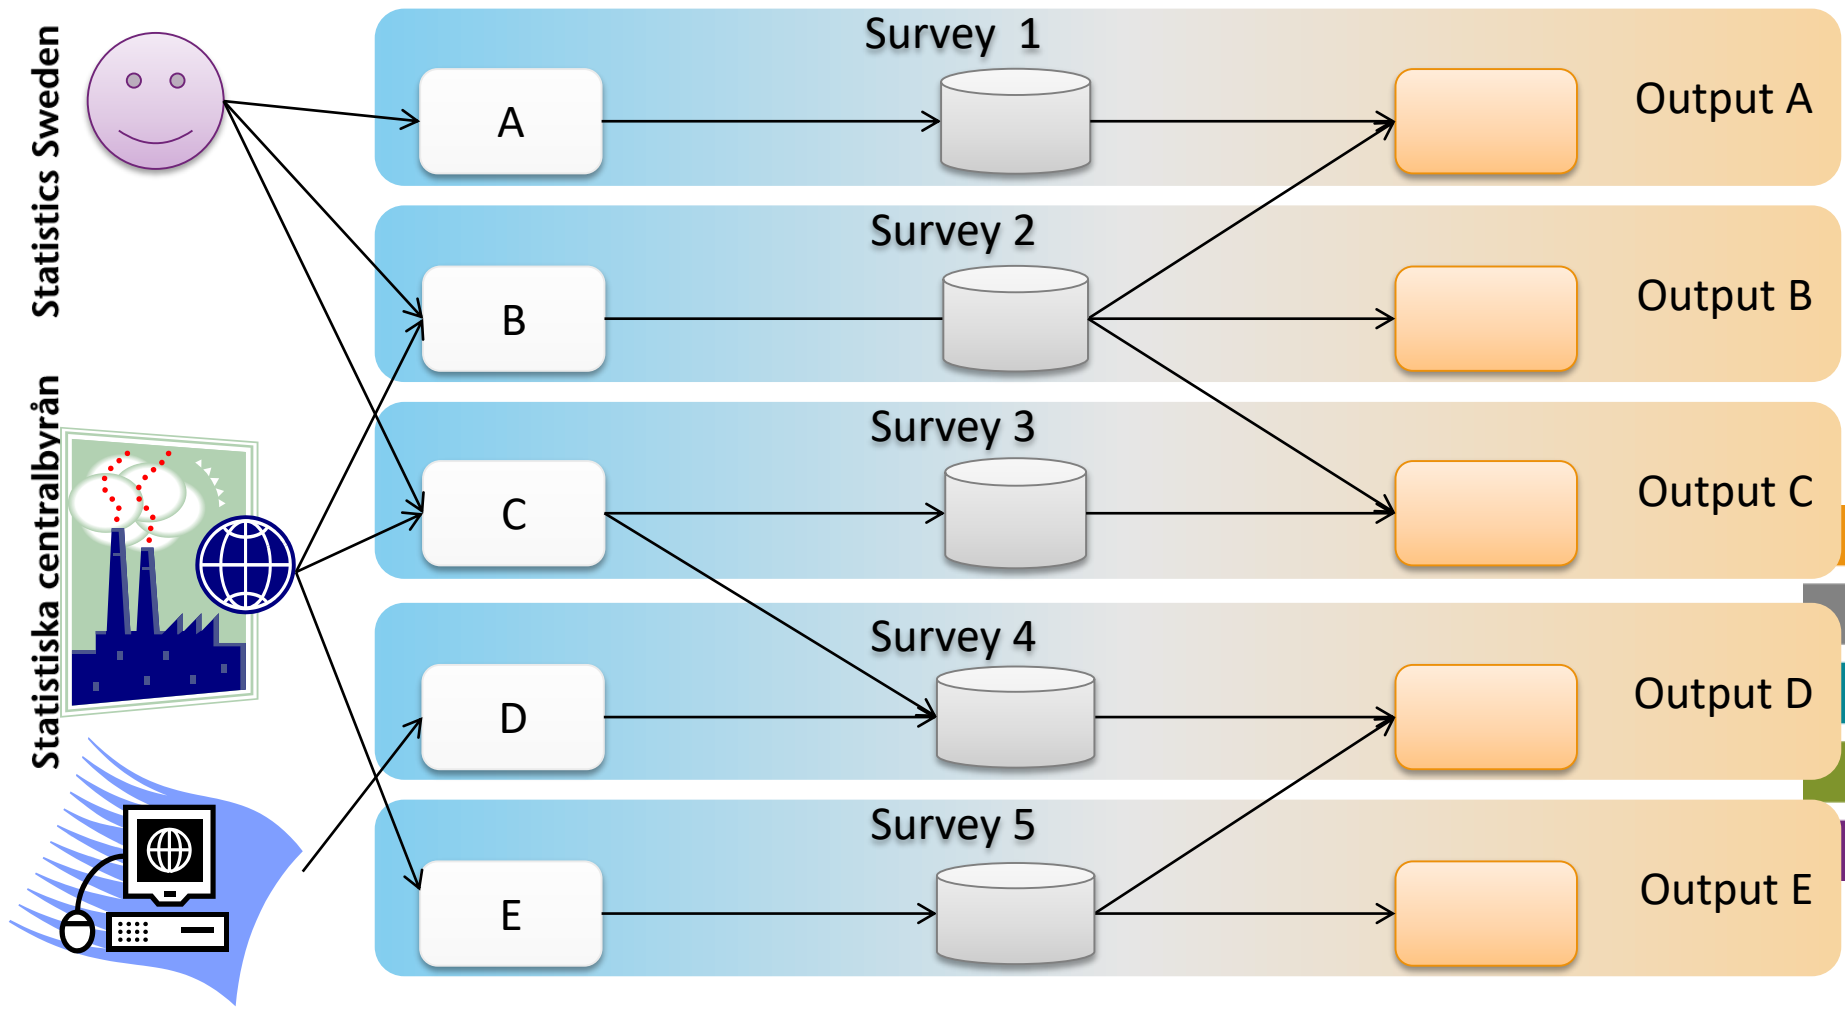

- Formats
- Technical solutions

## Co-operation with others

- Other authorities
- Service providers
- Other agents (e.g. accounting- och wages consultants)

# Coordinating questionnaires – The current situation

# Coordinating questionnaires – The vision
